## **DETAILED ACTION**

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

Independent claims 40, 45, and 56 are allowed. The prior art discloses a multicast and/or unicast communications system for transmitting data packets over a network of interconnected nodes, comprising: multicasting a message from a source node to a receiver group; unicasting a control message from a source node across a primary node to an ordering node for a designated multicast group or transmission, wherein said primary node aggregates messages from their subtrees and hence staggers the ordering process upward within the tree;

The prior art however fails to disclose determining a binding sequence number for the multicasting message and then delivering messages to end hosts according to agreed-upon sequence numbers setup prior to transmission.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
